• Assembly

1. Take device out of wristband to charge before use. Please note that the 2 metal touch points on device need to fit the 2 touch points of charger, as below.

When charging is between 0%-90%, the blue LED stays bright
When charging is between 95%-99%, the blue LED will flash.
When charging is 100%, the blue LED will go off.

2. After charge is finished, put the device back into the wristband.

3. Wear the smart bracelet

4. Get the APP "Smart Movement" below:

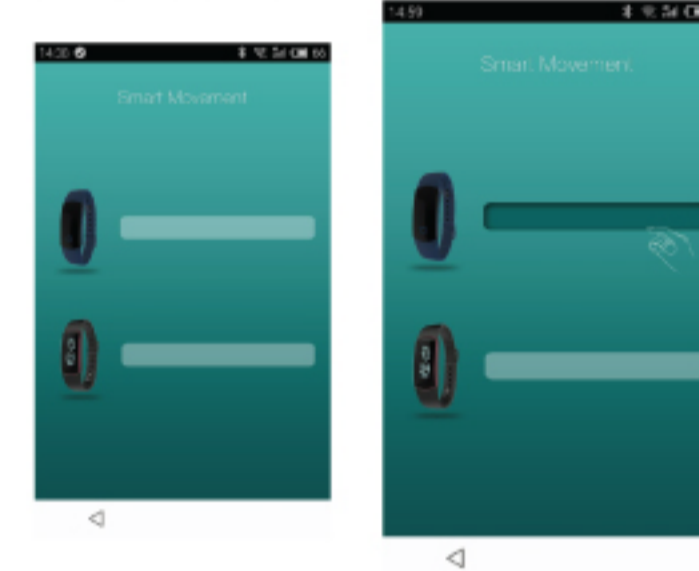

1. Iphone (IOS7.0 or above), search "Smart Movement" in the app store to download and install it;
2. Android Phone (Android 4.3 or above), search "Smart Movement" in Google Play to download and install it.
3. Iphone (IOS7.0 or above) and Android phone(Android 4.3 or above) can scan below QR code to download "Smart Movement" APP for installation.

3

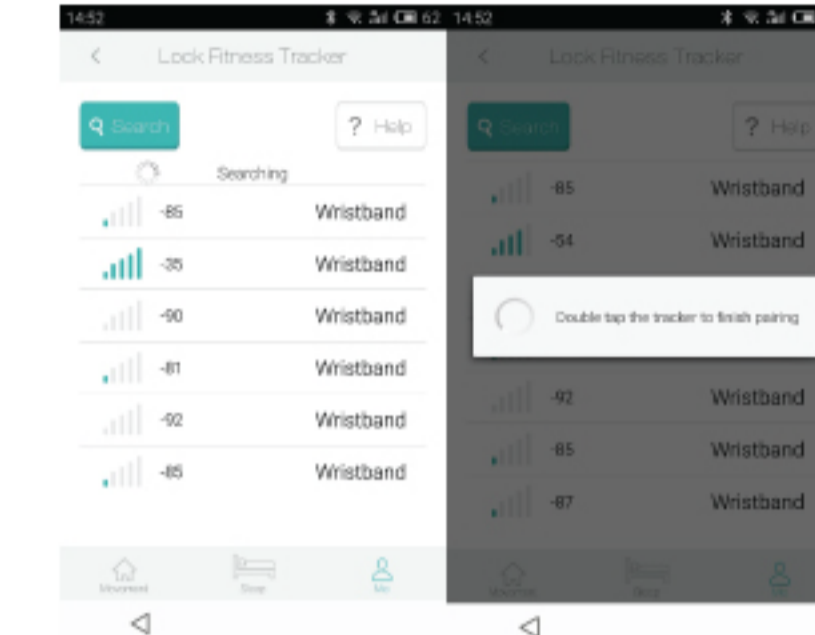

• Connect smart bracelet with APP

1. Make sure the mobile phones Bluetooth, wifi or 3G/4G is on for connection purposes. Run the "Smart Movement" App, select the first wristband as picture 2 show.

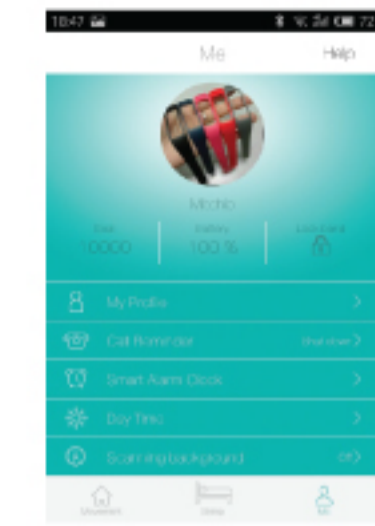

2. After you select the wristband, the app will go to the search page automatically. Wait a few seconds for app to search wristband. Please make sure the distance between mobile phone and wristband is no more than 0.5m during searching and connecting.

3. The closer the wristband is to the phone, the better the signal will be. Please select the strongest signal and the wristband will show blue light. After, the mobile phone will show as below right image. Double tap the wristband screen to finish pairing and the wristband will vibrate and blue light will show.

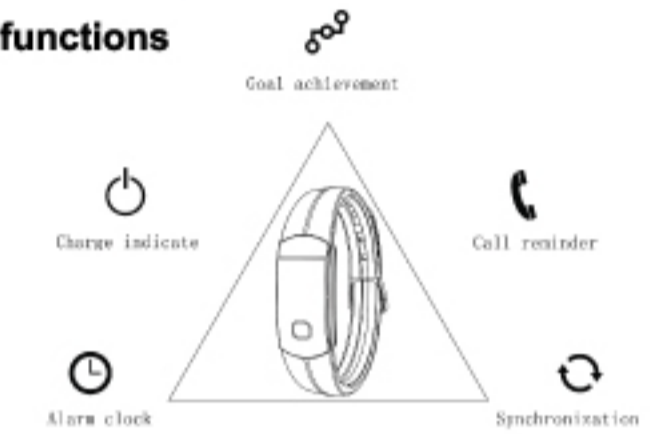

4. After device is connected successfully you will be sent to the 'Me' page. From there you can lock your device, see your battery life, or click on one of the tabs for other options.

5

• Basic functions

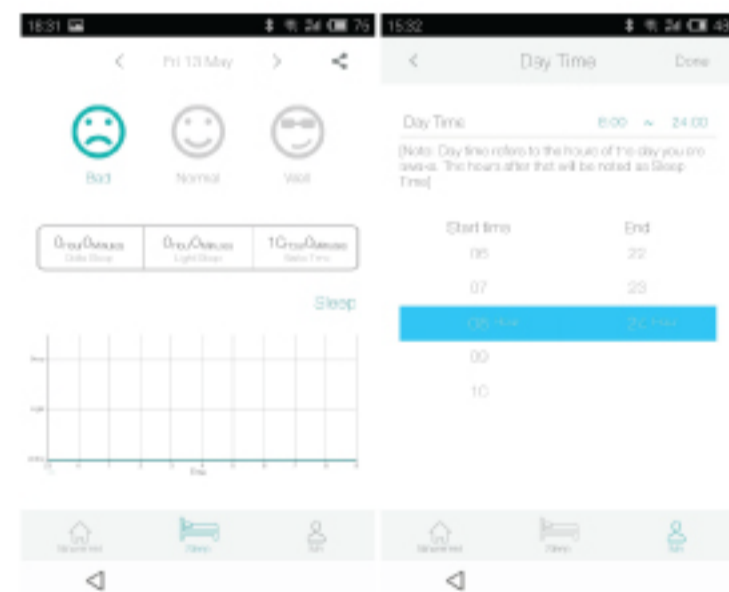

1. Once in Movement tab, Touch this icon "On" to synchronize data. Press the "<" or ">" on the top to check the different date data.

6

2. Sleep monitor

Go to 'Me' page to set the daytime for when you will be awake. Time between that will be considered sleep time. Make sure to wear the band when sleeping to track your sleep quality.

Go to 'Me' page to set My profile, Call Reminder, Smart Alarm Clock, language, and Device.

7

• Vibration remind

1. When the set goal is completed 50%, 75%, 100%, the smart bracelet will vibrate 2 times, 4 times, or 6 times.
2. If you set the alarm clock, it will vibrate 30 times.
3. If you are receiving a call, it will vibrate 4 times.

• Waterproof

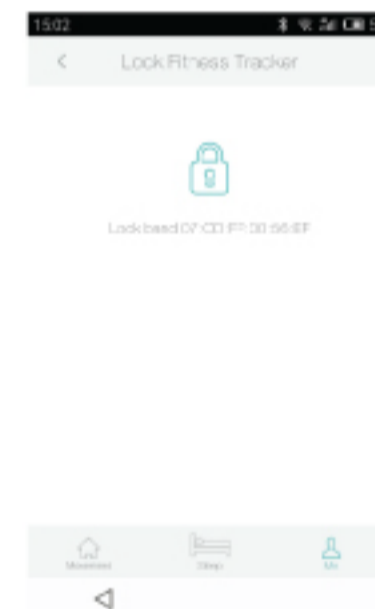

This Smart bracelet uses ultrasonic technology. With it being waterproof IP67, you don't need to take off your smart bracelet when you take a shower or swim in daily life.

• Unbind wristband

Click Lock band on 'Me' page, then click the lock icon. Commit to unbind the wristband. Please note, once you unbind wristband it will erase info.

8

FAQ

1.Can't find device when paring bracelet?

- 1). Please make sure the smart phone Bluetooth is ON and your smart phone is OS Android 4.3& IOS 7.0& above.
- 2). Please make sure the distance between phone and device is no more than 0.5m.
- 3). Please make sure the device is not low on battery. If there is still a problem after a full charge please make sure there are not any other Bluetooth devices around. Too many Bluetooth devices may effect the search.

2.Can't connect the device with APP?

Some smart phones Bluetooth service will be abnormal. Please reboot the phones Bluetooth or reboot the smart phone for paring again.

3.How to know the bracelet is on?

Charge it to see if the blue light turns on.

4.How to know the battery status?

When charging is between 0%-90%, the blue LED stays bright
When charging is between 95%-99%, the blue LED will flash.
When charging is 100%, the blue LED will go off.

You can also connect the bracelet with the APP to check the battery status.

5.How to connect another bracelet?

Please make sure to unbind the current bracelet, then to connect the next one.
